Portfolio

Tongi, Gazipur

Senior System Analyst with proven experience in **ERP implementation, automation server management, and AI-assisted development**. Actively supporting **day-to-day remote production operations for an Australian company**, ensuring system stability, automation efficiency, and SLA compliance. Hands-on with **Claude AI** for code generation, debugging, documentation, and workflow optimization. Strong background in manufacturing (RMG/Textile), distributed systems, and cross-timezone collaboration.

CORE COMPETENCIES

ERP Implementation & Rollout Leadership. AI-Assisted Development & Prompt Engineering, Vibe coding	Hands-on experience with Git-based version control and CI/CD pipelines , automating deployments from code repository to server environments using GitHub Actions .	Manufacturing & Supply Chain Module Expertise (Cutting → Sewing → Finishing → Shipping etc.)
Post Go-Live Support , Hypercare & SLA Management	UAT, System Testing & Deployment Management	User Training, Documentation & Knowledge Transfer, Prompt Engineering
Business Process Mapping & Requirement Analysis (BRS, BCP, FRS, FDD, TDD)	Automation , IoT & Production Efficiency Tracking	Familiar with SAP / Odoo / MS Dynamics ERP Manufacturing & Support Concepts
Cross-Functional Stakeholder Coordination, API Integration	Database Optimization (Oracle SQL, MySQL, SQL Server, PL/SQL)	Vendor & Development Team Governance

WORK EXPERIENCE

Senior System Analyst	December 2023 – Present
Amtranet Group	Tongi, Gazipur, Bangladesh

Achievement

- Led ERP rollouts across multiple RMG units, supporting **1,000+ users** with minimal disruption.
- Improved production visibility via real-time tracking, reducing decision delays by **40%**.
- Increased end-to-end operational efficiency by **18%** through ERP workflow optimization.
- Automated reporting dashboards, cutting manual effort by **60%**.
- Maintained **99.9% system uptime SLA** during peak production and post-Go-Live hypercare.
- Reduced order-to-shipment lead time by **22%** through supply chain process optimization.
- Provide daily operational support for an **Australian company**, ensuring uninterrupted service delivery.

Duties and Responsibilities

- Manage **automation servers and ERP production environments**, including monitoring, patching, and performance tuning.
- Use **Claude AI, Microsoft 365 Copilot, ChatGPT** daily for:
 - ★ Code generation and refactoring
 - ★ Debugging production issues
 - ★ Improving technical documentation and SOPs
- Capture, analyze, and validate business requirements for ERP and manufacturing applications.
- Conduct **end-to-end business process mapping (BPM)** and gap analysis for production, supply chain, HR, and compliance.
- Lead **deployment, support, and hypercare teams**, ensuring SLA adherence and issue resolution ownership.
- Drive **cross-functional coordination** between departments (Cutting → Sewing → Finishing → Packing → Shipping).

- Manage **vendor and development partner relationships**, system enhancements, and release planning.
- Configure ERP modules, run system tests, coordinate **UAT**, and own **Go-Live execution plans**.
- Oversee ERP database performance, optimization, and data reliability (Oracle SQL, MySQL, SQL Server, PL/SQL).
- Perform **code-level customization** and develop business modules using Laravel/PHP and JavaScript.
- Implement **IoT production tracking integration** for worker efficiency and manufacturing insights.
- Deliver ERP training, user manuals, and system documentation for knowledge transfer.
- Ensure system security, compliance, risk mitigation, and business continuity planning.
- Maintain and update **BRS, BCP, FRS, FDD, TDD, FDD, TDD documents** for governance and traceability.

Software Customization & Support Engineer

July 2023 – December 2023

I-Infomedia Ltd

Dhaka, Bangladesh

Achievement

- Developed and maintained scalable **TV-VAS (Telecom Value Added Service) systems**, ensuring high reliability and performance.
- Optimized API services using **FastAPI**, improving response efficiency and reducing system latency.
- Managed **Windows & Linux (Ubuntu) server environments**, maintaining service continuity and resolving VM-level issues.
- Improved system stability by implementing structured debugging, monitoring, and deployment workflows.

Duties and Responsibilities

- Provide **L2/L3 technical support**, root-cause analysis, and rapid issue resolution for live systems.
- Deploy, manage, and maintain containerized services in server environments.
- Maintain database integrity and optimize queries Oracle SQL & MySQL. Built and supported internal web services and maintained technical documentation.
- Monitor and maintain virtualized infrastructure including **Windows VM and Ubuntu servers**.
- Maintain documentation, task tracking, and cross-team coordination for system updates and support delivery.

Senior Technical Support Specialist

June 2022 - June 2023

Kazi Traders

Dhaka, Bangladesh

Achievement

- Ensured high availability and stability of business-critical static, dynamic, and e-commerce platforms.
- Improved platform reliability by resolving complex **L2 server, hosting, and deployment issues**.

Duties and Responsibilities

- Led advanced technical support for hosted applications across shared and VPS environments.
- Diagnosed and resolved server, hosting, and deployment issues to ensure smooth Go-Live.
- Optimized backend configurations and databases for performance and scalability.
- Monitored system health, security settings, and uptime.
- Coordinated with internal teams for releases, fixes, and ongoing support delivery.

Junior Technical Support Engineer

October 2020 - June 2022

Kazi Traders

Dhaka, Bangladesh

Achievement

- Successfully developed and supported multiple client websites with consistent uptime.
- Delivered customized WordPress solutions aligned with business and UI requirements.

Duties and Responsibilities

- Developed and customized websites using **PHP, Laravel and WordPress (themes & plugins)**.

- Deployed and managed websites using **cPanel, FTP, and hosting control panels**.
- Provided day-to-day technical troubleshooting and root-cause analysis.
- Supported site performance monitoring, basic security checks, and content updates.
- Assisted senior engineers during deployments, updates, and production support.

Digital Marketing Intern

Workspace InfoTech Limited

August 2019 - October 2019

Dhaka, Bangladesh

Achievement

- Supported multi-platform digital marketing campaigns that improved online visibility and audience engagement.
- Contributed to SEO and analytics-driven improvements for websites and client campaigns.

Duties and Responsibilities

- Assisted in planning and executing campaigns across **Google Ads, Facebook, and Instagram**.
- Performed SEO activities including keyword research, on-page optimization, and backlink analysis.
- Created, scheduled, and monitored social media content to boost engagement and brand awareness.
- Supported email marketing campaigns using **Mailchimp** and tracked performance metrics.
- Analyzed website and campaign data using **Google Analytics**, competitor research, and client reporting
